Practical Exercises Submission Guidelines:

1. Mails should be sent only to comnet2012a@gmail.com with the following header:
   Ex# Practical <Partner 1 full name>, <Partner 2 full name>
2. You may write anything you want in the body of the mail, but the attachment should be of the following format:
   a. EX#_ID_MACHINE.zip where:
      i. # = Exercise number
      ii. ID = ID of one of the partners.
      iii. MACHINE = NOVA/VM according to the machine your exercise should be tested on. NOVA & NETZER'S VM are the **only** available options.

   The body of the mail must also contain the names of the submitters and their IDs.

3. The zip file of the attachment should contain:
   a. All your source/header files **(without any directories)**.
   b. Makefile that supports:
      i. make all – which compiles your code into the current directory
      ii. make clean – which removes all your object/executable files.
   c. **The Makefile should compile the source files with –Wall and -g flags**.
   d. **Readme in pdf format only**.
      The first 2 lines of the readme should include:
      i. <Partner 1 full name>SPACE<Partner 1 ID>
      ii. <Partner 2 full name>SPACE<Partner 2 ID>

      The rest of the readme should include a brief explanation of your implementation and any information you consider as necessary to the grader.

4. **No other attachments should be included.**
5. Exercises that won't fit to the above template will lose points.
