

Computational Genomics: Guidelines for Assignments' Solutions

Assignments constitute a large part of your final grade in the course. They should be done *independently*, either individually or in *pairs*, without any help from others. Duplicated and copied works will be given zero grade. Using articles, books, or web resources is perfectly acceptable as long as you include the *full* reference in your relevant answer.

If you have troubles finding a partner for solving the exercises, you may email the course staff, and we will post your name and contact in the course website.

Solutions should be submitted to Amos by 2pm of the due date. The preferred submission method is by e-mail to amos@post.tau.ac.il in .ps, .pdf, .rtf or as plain text files. You may also submit *clearly* written solutions to Amos' mailbox (no. 324).

Questions sometimes have (unintentional) bugs in them, so take a good look at the assignments as soon as you can, and report problems if you encounter them. You may refer queries regarding the exercises to amos@post.tau.ac.il and the course team may decide to post them, with the relevant corrections and/or clarifications, in the course web site.

We wish you an enjoyable work and good luck!
