Subject: registration for topics of lectures in the Sadna -- STARTING THE REGISTRATION SOON

Shalom

I have now prepared the list of topics so that it fits the number of students in class (15).

We will have 15 lectures done over 5 days (3 lectures every meeting).

Attached is the UPDATED paper list. It is similar to the list that appeared in the site until today but it has changes. It also appears now in the web site (under the title UPDATED).

For each paper please examine the RECTANGLE next to it. In the rectangle the LARGE NUMBER determines the week in which the lecture will be given (so 1 means the FIRST week of student lectures, and the numbers range between 1 to 5).

You should divide to 5 teams

The first team – 2 persons - (Bittorrent) will take lecture 1.1 and 1.2 – and give them on week 1 on the first 2 hours.

The second team – 4 persons - (VOD) will take lectures 1.9 1.10 1.12 1. 13. It will give them on the last hour of week 1 and the 3 hours of week 2.

The third team – 3 persons - (Hash Lookup) will take 1.3 1.4 1.5 and give them on week 3.

4th team – 3 persons - (Incentives and ISP ): take 1.6 1.7 1.8 and lecture on week 4

5th team – 3 persons - (streaming) take 1.14 – 1.18. Give 3 lectures on your selection subject to the following constraints: a) take one Survey and 2-3 papers. B) Include in the papers 1.18.

Since this is a New Assignment – please – Register to it as NEW REGISTRATION. If you registered before – PLEASE REGISTER AGAIN.

Lectures will start on week of May 20 (nonetheless – we might start them a week earlier if time permits – so be ready one week earlier).

HOW TO BID for A SUBJECT:

Starting SUNDAY April 15 at 12:00 (At NOON) – you may send an email to the mailing list 0368-4172-01@listserv.tau.ac.il.

Bidding Emails arriving before April 15 at 12:00 – Will be discarded. Bidding Emails arriving to the list after 12:00 will be granted on a First-Come-First-Served Basis.
Comment: For those of you who already sent registration. Please send them again following the rules above.
Comment2: For some of the weeks some coordination is needed among the team members (e.g if number of topics > number of students). Be sure to do this coordination prior to the bidding.

Hag Sameach
