Software Engineer Student – Adallom

Location: Herzeliya

Adallom (Acquired by Microsoft) is developing the next generation of security tools, when your data is outside your network, and firewalls and perimeters don’t work.

Our technology allows organizations to protect their data in the cloud from any location, device or network (Wow! It’s magic!)

If you’re an awesome team player, looking to work in a live, vibrant environment, where you can contribute, learn and influence - your place is with us!

Required skills:

• Currently a second or third year B.Sc. or M.Sc. student in Computer Science, Software and Computer Engineering, or equivalent.

• GPA of 85+

• Team player skills, effectiveness both in independent and collaborative work.

• Ability to learn and use new technologies.

• Passion to agile development methodology.

• Experience is an advantage, not a MUST.
