Problem #41 (Solved !)

Originator: Participants at Unif Val d'Ajol Date: April 1991

Summary: What is the complexity of the first-order theory of trees?

The complexity of the theory of finite trees when there are finitely many symbols is known to be PSPACE-hard [Mah88]. Is it in PSPACE? The same question applies to infinite trees.

Remark

The problem is non-elementary [Vor96].
